## Projects

### SOFT DRINKS MANAGEMENT SYSTEM

It is to provide an easy way not only to automate all functionalities of a Soft Drinks Manufacturing Companies Office, but also to provide full functional reports to top management of company with the finest of details about every aspect of inventory and sales Soft Drinks Office Management System is a process for implementing all sales and inventory activities of a Soft Drink factory in a computerized automated way to promote sales by keeping inventory for large final selling products.

### MOVIE TICKET BOOKING SYSTEM

The movie ticket booking system using C is a software application that allows users to book movie tickets conveniently. It provides a user-friendly interface to select movies, showtimes, and seats, and handles payment processing. The system also includes features such as seat availability checking and ticket cancellation. By utilizing C programming language, it ensures efficient performance and robust functionality for seamless movie ticket reservations.

### QR-Code Generator Application

QR codes are used in many apps for displaying data in machine-readable form. These codes are used to represent data in a secured manner that is readable only by machines and not by humans. We have seen many apps that provide QR codes and we can scan those QR codes with our mobile device. In this article, we will take a look at how we can generate a QR Code for our app. We will be creating a simple QR Code generator app in which we will be adding data from the app and generate a QR Code that will display the data inside it.
